

Agenda for

Michael E. Berrett, PhD, CEDS & Quinn Nystrom, M.S. Founder/President - Qspeak and Center for Change National Diabetes Ambassador presenting on:

“12 Core Principles in Treatment and Recovery from Eating Disorders and Related Illness” and “Eating Disorders & Type 1 Diabetes: A Complicated Relationship”

**March 28, 2018
8:00am-12:00pm
Presentation**

8:00am- 12:00pm

- 8:00am
 - Check in and Breakfast
- 8:30am-12:00pm
 - Presentation

This workshop will address 12 core areas which are critical in the treatment process and the pathway to recovery from an eating disorder and related emotional, mental, and addictive illness. It will address critical topics including: finding reasons for recovery, accountability, embracing feelings, separating person from illness, creating structure, social support, listening to heart, reconnection, avoidance, identity, and love – and the role of each in treatment and recovery. Each critical area will be examined at the level of principles, themes, and clinical intervention.

Living with type 1 diabetes is complicated enough, but then throw in a dual diagnosis of an eating disorder, and the management of the two becomes tricky. Eating disorders paired with diabetes can be a life-threatening combination. Quinn will discuss her personal journey of seeking recovery, and how healthcare professionals can help guide and support their patients who present with both a chronic illness and an eating disorder.

- Question and Answer

Format: Presentation

Date: March 28, 2018

Time: 8:00am -12:00pm

Presentation Length: 3 Hours

Type: Lecture, interactive with Question and Answer

Presenters: Michael E. Berrett, PhD, CEDS and Quinn Nystrom, M.S. Founder/President - Qspeak and Center for Change National Diabetes Ambassador

Presentation Title: *“12 Core Principles in Treatment and Recovery from Eating Disorders and Related Illness” and “Eating Disorders & Type 1 Diabetes: A Complicated Relationship”*

Brief Description of Presentation:

This workshop will address 12 core areas which are critical in the treatment process and the pathway to recovery from an eating disorder and related emotional, mental, and addictive illness. It will address critical topics including: finding reasons for recovery, accountability, embracing feelings, separating person from illness, creating structure, social support, listening to heart, reconnection, avoidance, identity, and love – and the role of each in treatment and recovery. Each critical area will be examined at the level of principles, themes, and clinical intervention.

Living with type 1 diabetes is complicated enough, but then throw in a dual diagnosis of an eating disorder, and the management of the two becomes tricky. Eating disorders paired with diabetes can be a life-threatening combination. Quinn will discuss her personal journey of seeking recovery, and how healthcare professionals can help guide and support their patients who present with both a chronic illness and an eating disorder.

Outline for 12 Core Principles in Treatment and Recovery from Eating Disorders and Related Illness:

- 1) Overview
 - a. The seriousness of the illness, including stats
 - b. Concurrent illness stats

- 2) Treatment Options
 - a. Levels of care
 - i. APA Guidelines
 - b. Evidence based treatment
 - c. Treatment based evidence
 - d. Treating the whole person
 - e. Structure
 - f. Aftercare
- 3) Assessments
 - a. Dietary
 - b. Medical
 - c. Psychological
- 4) Interventions
 - a. 12 core principles
 - i. Take the ED off the pedestal
 - ii. Find and nurture reasons for recovery
 - iii. Separate the person from the illness
 - iv. Embrace feelings without self-judgment
 - v. Create structures which invite success, hope, commitment, sacrifice, hard work, and recovery
 - vi. Creating social support, both given and received
 - vii. Reconnection to self, others, spirituality, life
 - viii. Giving and receiving love
 - ix. Feel the fear and do it anyway: avoid only avoidance
 - x. The truth shall make you free: accountability and honesty
 - xi. Seek the therapeutic mirror of spiritual identity
 - xii. Reinvent what you trust: listening to and following the heart

Outline for Eating Disorders & Type 1 Diabetes: A Complicated Relationship:

- 1) Describe what life is like for an individual living with Type 1 diabetes.
- 2) Reasons why people with Type 1 diabetes are more at risk for eating disorders.
- 3) Describe the events that occurred to make the switch in thinking between being a victim or a victor with life with ED-DMT1.
 - a. Motivation to seek treatment.
 - b. Describe how recovery is a daily decision that needs to be made with Type 1 Diabetes and an eating disorder.
- 4) Unique challenges for a person who has Type 1 diabetes and an eating disorder.
- 5) Compare and contrast different medical professionals and the approaches they use in interacting with patients, and how those can affect one's life care with ED-DMT1.
- 6) Describe the 5 best communication styles when talking with patients living with diabetes.

Learning objectives for 12 Core Principles in Treatment and Recovery from Eating Disorders and Related Illness:

Based on the content of the workshop participants will be able to:

- 1) List 12 critical areas to address in the treatment of eating disorders
- 2) Describe practical interventions which address each of these core areas of treatment
- 3) Recite personal application of principles as well as application of principles in the benefit of those we serve

Learning objectives for Eating Disorders & Type 1 Diabetes: A Complicated Relationship:

Based on the content of the workshop participants will be able to:

- 1) Describe the complicated relationship with a person who is diagnosed with ED-DMT1.
- 2) Describe five communication styles to use when talking with a patient with type 1 diabetes and/or an eating disorder.
- 3) List various ways that aid in someone's success and increased self-efficacy when managing ED-DMT1.

Statement of possible risk:

It is possible that participants, as a byproduct of attending this training, will have an opportunity to look at themselves and apply principles into their own lives, as well as those they treat. Therefore, there is always potential that participants could experience a mild degree of emotional discomfort as they look in the emotional mirror in application of these principles in their own lives.
