The TRICARE RTC benefit is for medically necessary treatment, not for long-term placement. Family participation is required and the goal of treatment is to return the child home. The residential treatment is intended for stabilization, so that treatment can resume on an outpatient basis.

- The decision of frequency and who must participate in family therapy is based upon the clinical circumstances.
- For families located within reasonable traveling distance of the RTC, family therapy is conducted on site.
- When families are located at a distance from the RTC (usual 250 miles or more) they are **required** to attend family therapy on site once each month. However, the family must meet with a therapist in their own community. The family’s community therapist may collaborate and hold

combined telephonic sessions with the child's therapist at the RTC. This is known as Geographically Distant Family Therapy (GDFT).

- To facilitate GDFT, the community therapist is authorized as part of the RTC process. There is no copayment for the family for this service.
- It is expected GDFT begin with the first two weeks of the patient's admission to the RTC.
